Dear Colleagues,

On behalf of the Local Organizing Committee I invite you to come to Ljubljana, Slovenia, to the 26th European Conference on General Thoracic Surgery from 27th to 30th May 2018.

Ljubljana is the capital of the Republic of Slovenia which is a Central European country, geographically located in the heart of the old continent bordering on Austria, Italy, Hungary and Croatia. The three borders point between Slovenia, Austria and Italy is the unique ethnical point of the world because only at this point the three ethnical groups of nations meet. Italy representing the Romanic speaking nations spreading southwest to the southern borders of the South America. Austria representing the Germanic speaking nations spreading north to the northern borders of Europe. And Slovenia representing the Slavic speaking nation spreading East to the eastern border of Russia. Slovenia is a very small but at the same time a very diverse country, with the southeastern part of the Alps, a coast of the Adriatic Sea and the Pannonian region at the East. Ljubljana is localized centrally in the country, so it is very easy to travel to all parts of the country in one day. You can visit the Adriatic Sea, the Alps or the Pannonian region. Ljubljana is an ancient city with a very beautiful medieval center, but at the same time it is very young at heart. If Vienna and Prague got married and had a baby, then this child would certainly be Ljubljana. Ljubljana is definitely a historical city but also culturally vibrant with a blooming café society and immersed in the green surrounding. In 2016 it has been named the European Green Capital. Whether you see life in black or white you might not have known us yet, but when you come to us next year our hospitality will be warm and genuine.

The venue of the Conference is located in the very center of Ljubljana, so you will be able to walk from all the hotels to the Congress Center and from the Congress Center to the old medieval attractive parts of Ljubljana with nice restaurants and cafes.

It is my honor to invite you, all the colleagues from all the continents of the world, to come to Ljubljana. With the ESTS Council we will do our best to make your coming as agreeable and rewarding as possible and hoping that you will leave Slovenia at the end of May 2018 professionally and socially rewarded.

Looking forward to seeing you in Ljubljana.

Marko Bitenc
Chair, Local Organising Committee
Dear Members, Friends and Distinguished Guests

Why would you all be in Ljubljana between the 27th and 30th of May 2018?

The European Society of Thoracic Surgeons (ESTS), our Family, is hosting its 26th Annual conference. Together, we will be celebrating 25 years of constant presence, growth and strength in the Thoracic Surgical Fraternity.

An ever exciting program with renowned speakers, Junior Surgeons and Industry partners will guarantee a meeting worth not only attending but also actively contributing.

This year, our Program Committee will be encouraging stronger junior family member participation. New educational streamlined pathways will be introduced. And the exhibition village will offer first hand introduction to new and exciting technology with one to one interaction.

A special welcome and gratitude to our Industry Partners who have always considered and supported our educational needs.

Our Society remains a Global Organization with European roots. Through such educational events, it cares for all Thoracic Surgeons and their patients across the Globe. Their concerns and quest to treat Thoracic pathology is our mission statement.

We are confident that during the Conference, Ljubljana, with its beauty, its local residents and our members will provide the best ‘ingredients’ for a meeting to be long remembered by its delegates and the city itself.

Kostas Papagiannopoulos MD, MMED THORAX, CTH
President
Dear Nurses and Physiotherapists,

As health professionals and members of the team for the treatment of patients in the field of General Thoracic Surgery you are all cordially invited to attend the 5th Symposium for nurses and allied professionals at the 26th ESTS conference in Ljubljana, Slovenia 2018. The topics of the symposium were chosen to give you the opportunity to present your experiences and share the knowledge.

Prepare your paper and present it at the largest and most important International symposium for nurses and allied professionals in general thoracic surgery. Meet and communicate with other healthcare professionals from different countries and learn more about the modern principles of care of patients with chest diseases and trauma.

Use our symposium as an important tool in your continuous professional development for the benefit of patients.

All you have to do is to submit your abstract for presentation or simply register for the symposium and come to Ljubljana at the end of May 2018, the most beautiful time to visit the capital of Slovenia.

Call for abstracts is from 1 December 2017 to 28 February 2018. When participating in the nursing programme, you are welcome to join the other scientific sessions as well.

We are looking forward to welcoming you.

Marko Bitenc
Chair, Local Organising Committee
Slovenia is included in the Schengen zone since the end of 2007 and was proud to hold the Presidency of the Council of Europe in the first half of 2008.

...AN ANCIENT CITY, BUT YOUNG AT HEART...
If Vienna and Prague got married and had a baby, then this would certainly be LJUBLJANA...

HIGHLIGHTS
Slovenia (and Ljubljana) was in 2014 proclaimed Lonely Planet’s Best Place in Europe and one of Europe’s most idyllic places to live by Forbes in 2008. Ljubljana is already one of Europe’s greenest and most livable cities, boasting a friendly cafe culture by day, and vibrant nightlife after the sun sets. Slovenia, which is as picture-perfect as Switzerland but much easier on the wallet.
Ljubljana is the European Green Capital 2016. Since Ljubljana is a very green city, with the main park touching the city centre, and Slovenians are in general very fond of nature, the outdoor space and recreation, a lot of possibilities for recharging batteries are available.

SAFETY
Both Slovenia and Ljubljana are regarded as very safe destinations with the crime index positioned at 29,60 and safety index at 70,40. There are numerous sources that confirm this fact, such as travel guides, articles in international media and social platforms (travellers’ reviews, forums, blogs...).

VISA RESTRICTION
Slovenia entered the Schengen Agreement in 2007 and thus EU citizens do not require a visa to enter Slovenia, a passport or ID card is sufficient. Non-EU citizens are kindly advised to check the requirements at the website of the Slovenian Ministry of Foreign Affairs at www.mzz.gov.si/en.

It is recommended to begin the visa application procedure two months before the travel date.

CD Congress Centre Ljubljana can handle the procedure of guarantee letters, requiring a one-week time frame and costing EUR 12 per document.

Organisers: Robert Cerfolio (New York/US)
            Alan Sihoe (Hong Kong/CN)

- ESTS – AME Award: this is awarded for the best overall performance by a trainee member in the Postgraduate Course Master’s Cup Competition who wins an expenses paid one month attachment to a leading Thoracic Surgery Unit in China.
  The prize comes courtesy of AME Publishing Company

Format
This year, a brand new format aims to bring even more education from the experts.

2 levels of competition:
- Round 1: Teams present knowledge-based questions in key topics, with answers centered on the authoritative ESTS Textbook and supplemented by latest updates from global experts

- Round 2: Leading surgeons from around the world give personal, real-life tips and tricks on Life as a Thoracic Surgeon ... and then quiz the Teams!

Teams gain bonus points for well-reasoned explanations and well-designed questions – but can lose points if they press the buzzer before engaging brains!

In both Rounds, panels of ESTS experts will discuss the questions and answers, sharing their experience through insightful commentary.

SUNDAY, 27 MAY 2018 13:00 - 14:30 • LINHART HALL

Chairpersons: Luca Bertolaccini (Bologna/IT)
Torsten Gerriet Blum (Berlin/DE)

Oligometastic Lung Cancer Disease
Oligometastatic lung cancer disease includes patient with differing tumour biological behaviours prompting to individual radical treatment concepts. Neither definition of specific patient subgroups and characterization of their underlying molecular mechanisms, nor the question whether the radical treatment or oligometastatic disease itself contributes to its favourable prognosis have been satisfactorily clarified. This ESTS/ERS Joint Session will provide the latest evidence from multi-disciplinary perspectives.

ESTS-ENHANCED RECOVERY AFTER SURGERY (ERAS) JOINT SESSION
SUNDAY, 27 MAY 2018  15:00 - 16:00 h · LINHART HALL
Chairpersons: Tim Batchelor  (Bristol/UK)
Cecilia Pompili  (Leeds/UK)
Enhanced recovery after surgery (ERAS) and patient outcomes. The role of pulmonary complications is important as this influences post-op long-term survival and quality of life. Recent studies have shown that overall compliance is more important than individual elements of an ERAS pathway. PROs and ERAS have only been reported in a small number of colorectal and orthopaedic studies, but its importance has been highlighted in a nice recent review from Boston (Senturk JC et al, 2017).

NIGHTMARES IN THORACIC SURGERY
SUNDAY, 27 MAY 2018  16:00 - 17:00 h · GALLUS HALL
Chairpersons: Walter Klepetko  (Vienna/AT)
Gilbert Massard  (Strasbourg/FR)
This session aims to highlight extreme experiences that can occur to thoracic surgeons. Situations like that are extremely demanding and challenge the team not only in a technical, but also in an emotional way. Decision making is often the key factor for success or disaster and this process will be discussed with the audience in an interactive way.

LUNG SURGERY OF THE FUTURE
SUNDAY, 27 MAY 2018  17:00 - 18:00  •  GALLUS HALL
Chairpersons:  Nuria Novoa (Salamanca/ES)
               Piergiorgio Solli (Bologna/IT)

This session is focused on crucial topics that will be relevant for our specialty in the near future and will critically influence the next generation of thoracic surgeons. The panel of renowned speakers will cover issues like the relationship between surgeons and modern interventional pulmonologists, the new armamentarium soon or already available in operative room, the existing tools to improve safety and communication within the team, the best index to measure quality and outcomes of our performances. All these subjects will play significant role in the daily clinical practice of modern thoracic surgery and will be deeply presented and enthusiastically discussed. Please do not miss the chance to take part to this session!

Current issues in video-assisted thoracic surgery (VATS)
This session will include a topical and entertaining debate about the latest minimally invasive surgical approaches. Do you believe that robot assisted thoracic surgery (RATS) offers any benefits over video assisted thoracoscopy (VATS)? The session will also include a detailed appraisal of two advanced uses of VATS in the treatment of benign neurological disorders: thoracic outlet syndrome and phrenic nerve palsy. We will introduce some of Brazil's leading experts and engage in lively and information discussion. We look forward to seeing you in the audience.

LUNG CANCER SCREENING SESSION
MONDAY 28 MAY 2018 16:00 - 17:00 h · GALLUS HALL
Chairpersons: Jesper Pedersen (Copenhagen/DK)
Giulia Veronesi (Milan/IT)

Lung cancer screening with low dose CT in high risk individuals
Lung cancer CT screening aims to detect lung cancers earlier to improve radical treatment and in turn improve long term survival. European governments will soon align themselves with international recommendations and prevention policies already in place in the United States. Chest surgeons will play a central role in the screening process in Europe in the near future.

SUNRISE HANDS ON
TUESDAY 29 MAY 2018 07:00 - 08:00 h · E1-E2
In this session the delegates will be able to perform bronchoscopies, with rigid and flexible bronchoscopes and see the full range of accessories utilized in the management of endobronchial pathology and stent insertion.

Sunrise 1: Diagnostic management of peripheral small lung tumours. The benefits of electromagnetic navigation bronchoscopy. In this session the delegates will have the opportunity to experience a hands on session on performing ENB following a short lecture.

Sunrise 2: Airway endoscopy and management of airway stenosis. In this session the delegates will be able to experience first hand use of rigid and flexible bronchoscopes and will have the opportunity to see and use a range of single and bifurcated silicone and metal airway stents with discussion of various introduction techniques as well as tips and tricks of safe application.

EXTRAORDINARY GUEST LECTURE
TUESDAY 29 MAY 2018  12:30 - 13:00 h  ·  GALLUS HALL

Matevž Lenarčič is experienced long distance flier. He has flown for more than 3500+ hours all over the world, mostly with his ultra light airplane and other single engine aircrafts. He holds PPL - private pilot license with IFR - (instrumental flight rules) rating, night qualification, and ULPL - ultralight pilot license.

Matevž Lenarčič has graduated in biology. An alpinist, paraglider, environmentalists, photographer and a pilot, he has climbed all over the world and among others reached the top of 8051m Broad Peak in Himalaya and climbed extreme routes in Patagonia. He is author of 12 books (nature, photography, climbing and flying), some of them awarded and translated in several languages. He is also founder and director of Aerovizija d.o.o., company for aerial survey.

ABSTRACT SUBMISSION - INSTRUCTIONS TO AUTHORS

Please submit your abstract via:
http://cpaper.cltmeetingtech.com/ests2018

Please follow the instructions given on-line, otherwise your abstract cannot be selected for review. A summary of the guidelines is as follows:

- The abstract language is English
- The text should be not more than 300 words
- The use of 1 table or 1 graph is possible
- The abstract must consist of four paragraphs labelled: OBJECTIVE, METHODS, RESULTS, CONCLUSIONS
- The text and the title should be free from abbreviations, except those commonly used. It should concisely address the problem and the purpose of the study (OBJECTIVE); how the study was performed (METHODS); the main findings with numerical data and statistical significance (RESULTS); and the principal conclusions drawn from the study (CONCLUSIONS)
- The title of the abstract should be printed in CAPITAL LETTERS; the name(s) of the author(s) should be preceded by the full first name (middle name initial optional) - omit titles. The number of authors is unlimited.
- Since the abstracts will be judged anonymously, the text should not reveal the institutional affiliation
- Mark the category which best describes the subject of your abstract
- The material should not have been published, or presented at any international meeting before, nor submitted to another meeting during the same period.
- Only co-authors are allowed to present the paper

4 types of abstracts will be considered:
- Abstract/Poster
- Videos
- Case reports
- Nurse symposium

Abstracts will not be accepted by e-mail or fax
All abstracts should be submitted and posted according to the format and instructions described above no later than Tuesday 09 January 2018, 23:59 CET

The programme committee will meet 16-17 February 2018. The best abstracts are selected based on the average score by the reviewers from two rounds (one round for case reports and videos) and allocated for presentations as oral, forum, case report, video or poster, nurse symposium. Abstract acceptance and programme scheduling will be communicated to the corresponding author’s e-mail address early March 2018.

For your abstract to be included in the final scientific programme, it is mandatory to register for the congress and to settle payment as soon as you have received the notification of abstract acceptance.

Please check the eligibility for prize awards.

The presenter of an accepted abstract will also be asked to complete a form to be signed at the time of uploading the presentation to state whether his/her presentation can be released or cancelled after the meeting.
**ABSTRACT SUBMISSION - INSTRUCTIONS TO AUTHORS**

**IMPORTANT:**
ESTS expects that all speakers presenting in ORAL sessions and the Brompton and Young Investigator Award sessions to submit full manuscripts online for review to the European Journal of Cardio-Thoracic Surgery (EJCTS) by 1 September 2018. Moreover the prize winners in all other prize sessions must submit full manuscripts online for review to the European Journal of Cardio-Thoracic Surgery.

Note that the Programme Committee will consider the previous manuscript submission record of ALL speakers when preparing future ESTS meetings.

**THE FIRST AUTHOR OF ABSTRACTS IN ORAL AND PRIZE WINNING SESSIONS WHO DOES NOT SUBMIT HIS/HER MANUSCRIPT TO EJCTS BY 1 SEPTEMBER 2018 WILL BE EXCLUDED FROM ABSTRACT SUBMISSION AT THE NEXT ESTS ANNUAL MEETING**

Submission for review of forum, case report, and video or poster presentations to either EJCTS or ICVTS is optional but welcomed.

Manuscripts should be prepared and submitted according to the Instructions to Authors
- EJCTS
- ICVTS

The manuscript submission is online only at: [https://ejcts.oxfordjournals.org/](https://ejcts.oxfordjournals.org/)

Please mention “Presented at the 26th European Conference on General Thoracic Surgery of the European Society of Thoracic Surgeons, Ljubljana, Slovenia, 27 -30 May 2018,” on the title page of the manuscript.

ESTS requires that all speakers competing for the Brompton & Young Investigators Prizes sessions submit full manuscripts by e-mail to the ESTS Executive Director (sue@ests.org.uk) one month before the meeting at the latest, since these papers are included in the total scoring by the jury. The audio-visual recording of the scientific presentations will be the property of the ESTS.

**ABSTRACT SESSIONS**

Papers are allocated 7 minutes presentation time followed by a discussion period of 3 minutes.

Please note that only data projection will be available.

**INTERACTIVE CASE PRESENTATION SESSION**

The Program committee invites submissions of case reports for interactive presentation. It is an opportunity for any thoracic surgeon, particularly trainees and young surgeons, to present a case for discussion by the meeting and the experts who will be present. We encourage you to submit cases that are of interest in any of the followings:
- An uncommon clinical problem
- A particularly challenging problem of diagnosis or management
- An innovative surgical technique
- A clinical lesson
- A particularly illustrative case of interest for the thoracic community

The interactive presentations should be 5 minutes long including interactive discussion of 10 minutes. Video clips are welcomed but must be included within the time limit. The speaker should present the clinical case only, NOT a literature review or case series.

We would like you to explain in the abstract (300 words) what your case is about, what you think is of special interest for the audience and its clinical implications.
ABSTRACT SUBMISSION - INSTRUCTIONS TO AUTHORS

POSTER SESSION
A number of abstracts will be selected for poster presentation as moderated posters. There will be a Junior Poster Session and a Senior Poster Session.

This year during the allocated slot the presenter from each poster will have to be available to discuss his/her own work.

Maximum dimensions: Portrait: Length 140 cm, width 90 cm

Poster Printing in Ljubljana: The option is offered for printing your poster in Ljubljana.
Printing company: Eksplicit
Contact for orders: bostjan@eksplicit.si
Cost: 42 euros + VAT for colour print including delivery to the Conference Venue on 25 May 2018
Deadline for orders: Monday 21 May 2018

VIDEO SESSION
Submitted videos should be uploaded online in a compact-sized, average-quality format up to 100 MB for scoring by reviewers. The film should be 7 minutes maximal duration and it will be followed by a 3-minute discussion. The following formats are supported to upload:

PC formats: .WMV and .AVI
MAC formats: .MOV

Sound is acceptable but not necessary. However live narration by the principal surgeon is a requirement of participation. Authors will be asked to present their video at the meeting in a high-quality format without changes if accepted.

Abstracts for the Symposium for Nurses should be submitted online using the same system as other abstracts. Abstracts should not exceed 300 words. Videos can be considered and they should be uploaded online.

Submitted videos should be uploaded online in a compact-sized, average-quality format up to 100 MB for scoring by reviewers. The film should be 7 minutes maximal duration followed by a 3-minute discussion. The following formats are supported to upload:

PC formats: .WMV and .AVI
MAC formats: .MOV

Sound is acceptable but not necessary. However live narration by the presenting nurse is a requirement of participation. Authors will be asked to present their video at the meeting in a high-quality format without changes if accepted.

NO-SHOW AND WITHDRAWALS
Presenter: please note that if you accept to present your paper and then subsequently do not show up for presentation at the meeting in Innsbruck, you will be excluded from presenting at the next three annual ESTS meetings. If you are experiencing any unexpected problems to attend the meeting, please notify the Program Committee and ask one of your co-authors to replace you as presenter of the abstract. Only co-authors may present.

If you WITHDRAW your presentation less than four weeks prior to the meeting, after Friday 27 April 2018, the Presenter will be considered as No-Show
DUPLICATE SUBMISSION
We will use special software to check for duplicate submission. Duplicate submission will be defined according to the below indicated joint statement.
For duplicate submission, the first author will be excluded from presenting abstracts to the next three ESTS meetings. The first author will not be permitted to be included in the list of authors for the next three years.

JOINT STATEMENT ON REDUNDANT (DUPLICATE) PUBLICATION BY THE EDITORS OF THE UNDERSIGNED CARDIOTHORACIC JOURNALS
Full Text: http://www.jtcvsonline.org/article/S0022-5223(15)01306-9/fulltext

The co-signatory Editors hereby declare that they adhere to a process of information exchange and cooperation aimed at eliminating redundant (duplicate) publication in their journals.
Briefly, redundant publication is a paper that overlaps substantially with one submitted elsewhere or published without adequate cross-referencing and justification. We consider redundant publication to be unethical for the following reasons: The author unjustifiably receives 2 or more citations for only 1 article; the time of unpaid peer reviewers and editors is wasted on duplicate submissions; the burden of extra work slows the peer review process; the already extensive scientific literature is further inflated making literature search even more cumbersome; valuable journal pages are wasted. Furthermore, meta-analysis of multiple studies may become flawed when the same material is published repeatedly.

We intend to combat redundant publication by; using electronic search applications to identify potential duplications; sending doubtful papers for review by other journal editors; exchanging information about conference submissions and joint collaboration in programme committees; publishing joint statements exposing offenders in clear cut cases; imposing bans where necessary; and following up on potential copyright infringements.
For the purposes of this declaration, redundant publication is defined as follows:

1. The numbers or sample sizes are similar.
2. The methodology is identical or nearly so.
3. The results are similar.
4. At least 1 author is common to both reports.
5. Little or no new information is made available.

To classify as redundant publication all of points 1-5 must apply. Exceptions may include publications in local or regional journals, abstracts at scientific meetings, or original publication in a language other than English. The authors must bring these exceptions to the Editor's attention. The Editor’s judgment decides if points 1-5 apply for a specific case. The authors will be informed, and will be given the opportunity to respond. Because redundant publication constitutes serious academic misbehavior, instances may be reported to specialty society ethics committees for review and possible disciplinary action.

We hope that the authorship of our journals and the scientific community at large will support us in this endeavour, which we believe to be in the best interests of all.

Dear colleagues,

ESTS wishes to introduce an official trainee forum. Such group should be consisted by trainees with the assistance and mentorship of ESTS leadership. We consider the voices of our Junior force important and through such initiative we will encourage active participation in our educational events and annual conference.

Please express your interest to contribute to such a wonderful and energetic group by contacting Dr. Anna Frick or Dr. Olivia Lauk.

OVERVIEW
Over the recent years there has been an increasing demand in order to provide an International platform for trainees in Thoracic Surgery. Such initiative will have several advantages:
1. Offer exchange of experiences
2. Promote available fellowships and/or explore unmet needs for training
3. Allow presence and active interaction and participation in Annual conferences
4. Facilitate an harmonized pathway for training

PROGRAM OVERVIEW
1. Welcome and registrations
2. Brief welcome by the President of ESTS
3. Introduction of objectives of the group by Anna Frick MD and Olivia Lauk MD
4. Set the scene for future activities
5. Establish the platform for attracting new members
6. Close of program and dates future meetings
